

ANDORIAN ALE

Is a blue-colored alcoholic beverage concocted by the Andorians. It was typically drunk from shot glasses.

AUTOSUTURE

A laser-based medical device to heal and close wounds from surgery or deep trauma. It is used where the dermal regenerator is inadequate.

BACKPACK

A backpack is a facilitative and optional transportation device. Its usefulness has stood the test of time, and Commando operatives always appreciate that.

BASEBALL GLOVE

A type of glove used in the human sport of baseball. It is worn by players of the defending team for catching and fielding balls hit by a batter or thrown by a teammate.

BLOODWINE

A popular alcoholic beverage among the Klingons, best served warm. It is known to be highly intoxicating. Most non-Klingons are scarcely capable of tolerating it.

CARDASSIAN COMMUNICATOR

A personnel communications device typically worn on the wrists by Cardassian Soldiers.

CARDASSIAN PADD

A Personal Access Display Device is a hand-held computer interface technology commonly used for the easy access and sharing of data.

COMBADGE

A small personnel comm device integrated into an insignia badge. It is also a locator device for transporter beams and has an integrated universal translator.

CORTICAL STIMULATOR

A medical device used to revive neural activity in the nervous system of critical patients by delivering an electrical shock to induce brain activity.

DERMAL REGENERATOR

A common medical tool to heal minor skin wounds or scars. It can also be used to revert surgically modified skin to its normal state, as well as to simulate wounds or burns.

DOM-JOT CUE

A Cue used to play Dom-jot, a game played with a ball on a table with an irregular geometric coordination, similar to Terran billiards with certain elements of pinball.

FIELD-RATIONS

A pre-packaged meal carried by military troops in combat and other field operations, which require little or no preparation.

GRAVITIC CALIPER

A gravitic caliper is a type of engineering tool, which used an effect of gravity, and provided a precise adjustment to a plasma flow.

HOLO-IMAGER

Is a device that recorded a scene or a subject in 3-D, so that it could be reproduced in holographic form. It required that the subject be captured from multiple angles.

HYPERSPANNER

An adaptable multipurpose Eng. tool with its own internal power source. Its uses include repairing, relinking and bypassing circuit boards of electrical systems.

HYOSPRAY

A medical device used to inject liquids into the body without the use of a needle. Various drugs can be used, inserted in vials into the end of the instrument.
